Body Rejuvenation

BODY WRAPS

Body wraps enhance the health and appearance of the skin, while providing deep relaxation and tension release within the body. Each treatment begins with dry brushing, which removes dead skin cells and promotes lymphatic drainage and circulation. A mask is then applied to the body, followed by a plastic sheet and thermal blanket to warm the skin and open the pores. While the body is wrapped in the “cocoon”, the therapist performs a soothing scalp, neck, and foot massage. After the wrap is removed, moisturizer is applied to the body to seal in the benefits of the treatment.

Mineral Infusion Thermal Body Wrap (75 Minutes) Starting from \$235*: Elevate your wellness with a unique self-heating body wrap that is rich in copper, magnesium, zinc, and calcium, all known for therapeutic and healing properties.

Seasonal Body Wrap (75 Minutes) Starting from \$235*: Enjoy a delightfully scented service from our seasonal rotation of treatments, designed to engage the senses and address the changing needs of the skin.

BODY SCRUBS

The primary function of a body scrub is to remove dead skin cells and moisturize the skin. The treatment also stimulates circulation and lymphatic flow, which can be beneficial in reducing the appearance of cellulite and improving the skin's overall tone and texture. A gentle, purifying salt-based scrub is massaged into the skin, rinsed off, then a rich moisturizer is applied to seal in the benefits of the treatment.
